Tata SUVs in India

Feature guide A to Z, ex-showroom price and colours

Data as of October 2026. Models covered (10): Tata Punch, Punch EV, Nexon, Nexon EV, Curvv, Curvv EV, Harrier, Harrier EV, Safari, Sierra.

- All prices are ex-showroom (Delhi unless stated) in Indian rupees. 1 lakh = 100,000. Rs. 10.00 lakh = Rs. 1,000,000. On-road prices are higher and vary by city, state taxes, insurance and registration.
- Prices, colours and variant line-ups change often. Treat this document as a reference snapshot and confirm with an authorised Tata Motors dealer or tatamotors.com before buying.
- How to read the A to Z sections: price, colour, powertrain and safety-rating details come from published Indian car media (Autocar India, CarDekho, Rushlane, Gaadify, CarToq, MeraEV, V3Cars, Team-BHP and others). Per-feature entries marked 'higher variants', 'select variants', 'top variants' or 'check brochure' mean availability depends on the trim. Feature entries are summarised by trim level and are not an official Tata variant-by-variant feature matrix.
- Model-level facts such as Bharat NCAP and Global NCAP ratings: Punch, Nexon, Harrier and Safari carry 5-star Global NCAP ratings; Punch and Nexon were India's two best-selling passenger vehicles in June 2026.
